Using recombinant human G-CSF to treat chemotherapy-induced neutropenia over 3 decades: What is next?

Published On: September 12, 2023 | Pages: 001 - 004

Author(s): Jason Xu, Jonathan Sussman, Jessica Xu, Xing Zhao and Xiao Qiang Yan*

Chemotherapy-Induced Neutropenia (CIN) is a potentially fatal side effect of cancer treatment, affecting > 50% of cancer patients treated with chemotherapy. Clinical use of recombinant human granulocyte colony-stimulating factor (rhG-CSF) has allowed for primary and secondary prophylaxis of CIN and its sequela (i.e., febrile neutropenia, fatal infection) during myelos ...
