## **Pembrolizumab in Combination with Paclitaxel for Platinum-Resistant Epithelial Ovarian, Fallopian Tube, and Primary Peritoneal Carcinoma: Clinical Evidence, Regulatory Approval and Therapeutic Implications**

Published On: March 17, 2026 | Pages: 001 - 003

Author(s): Sulaiman Naseer\*

**Background:** Primary peritoneal carcinoma, fallopian tube cancer, and platinum-resistant epithelial ovarian cancer are aggressive cancers with few treatment choices and a dismal prognosis. In a variety of solid malignancies, immune checkpoint medications that target the programmed death receptor-1 (PD-1) have demonstrated encouraging activity.

**Objectives:** To examine t ...
